### DETAILED ACTION

The rejection under USC 102 (e) based on Kasukabe et al ('863) is withdrawn in view of the response filed on 11/18/04 under 37 C.F.R. 1.111 because it is sufficient to overcome the Kasukabe et al ('863) 's reference. However, rejection based on a newly cited reference lum et al ('784) follows.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Lum et al Patent No. 5,534,784 (lum et al '784).

lum et al ('784) (see Figs 2-3) disclose a method of testing a device, comprising the step of:

electrically connecting electrode pads (probe wires 84) of a device testing contactor (probe head 68) to electrodes (conductive bumps 54) of a device being tested (semiconductor die 52);

the electrode pads (probe wires 84) being formed on a wiring board (see Fig 2, 86) of the device testing contactor (probe head 68), and being reinforced by a reinforcing member (62,64,66), and

the device testing contactor (probe head 68) comprising the wiring board (86) and the reinforcing member (62,64,66) collectively bonded to each other (see Fig. 3).

Therefore, Lum et al ('784) anticipate the claimed invention.

***Response to Arguments***

Applicant's arguments with respect to claim 20 have been considered but are moot in view of the new ground(s) of rejection.
